Personal Projects

Flidais Flidais is a WPF program designed to make it easier to sift through a large data store. The program utilizes recursion to copy, move, delete, or compress files and folders. It filters through files by a chosen file extension. Its name is derived after the Celtic god of hunting.
Space Game 1 (to be given a better name closer to release) A 3D video game project done in Godot 4.3, .NET (C#) version. I handle the coding, writing, animation, and 3D modeling. The gameplay itself revolves around space flight in a fictional universe, with an ongoing expansive world building, alongside managing and customizing your spaceship.
Beavers N Wood Beavers N Wood is a game that served as my introduction to ASP.NET. The gameplay itself is heavily inspired by the famous web browser game, "Cookie Clicker". The project's future aims are to connect to a database to support multiple users and track progress in the game.
Cougar's Cave Cougar's Cave is a collaborative effort of the Mid-State Game Dev Club. The game utilizes Godot 4.3, .NET (C#) version, and is a 3D/2D fantasy game centered around cooking. My contribution is primarily focused on the coding, modeling, rigging, and animation.

Past Work Experience

2021 - 2023	Cashier / Senior Production	Goodwill - Wisconsin Rapids, WI	My job included handling the register, handling returns, stocking the shelves, taking donations from the door, sorting donations, determining value of donations, and managing the warehouse. The warehouse management included operating a skyjack. I also applied tags to said donations, opened and closed the store, swept the floors, sanitized the store, cash reconciliation, solicited donations, and trained team members.
2017 - 2020	Maintenance / Overnight Grocery Stocker	Walmart - Wisconsin Rapids, WI	My job consisted of maintaining the floors and bathrooms, making sure the aisles were well stocked, assisting customers when needed, and various odd jobs.
2020 - 2021	Janitor	Modern Janitorial - Wisconsin Rapids, WI	My job included cleaning and maintaining floors, taking out trash, and sanitizing restrooms, bedrooms, offices, laboratories, and operating rooms.
